O. E. S. Honor**Mrs. Cecil Studer.**

The members of St. Hilda's Chapter, O.E.S., spent a very enjoyable afternoon at the home of the worthy matron, Mrs. W. G. Evans, in honor of Mrs. Cecil Studer, who is leaving shortly to join her husband at Lethbridge.

After lunch was served Mrs. Studer was presented with a scarf, and the members joined in singing "For she's a jolly good fellow," and in wishing her every success in her new home.

I. O. D. E. Meeting.

The March meeting of the Mons Chapter, I.O.D.E., was held at the home of Mrs. W. G. Evans and in addition to being the usual business meeting was also a farewell to another departing member, Mrs. Cecil Studer.

At the conclusion of the business meeting, the regent, Mrs. Lowrie, on behalf of the members, presented Mrs. Studer with a purse. After this presentation bridge was played for an hour or so, the prize being won by Mrs. Ward Keith. A pleasant evening was brought to a close with a delightful lunch served by the hostess.

LOCAL & GENERAL

Davey Lee in "Sonny Boy," all talking picture, at the opera house, Friday, Mar. 28th. Matinee at 4 p.m.; evening 8.30 p.m.

Mrs. Reta Fluery returned last week from Calgary, where she has been taking a beauty course from Mrs. Kennedy.

Miss Lola Hunspurger has returned to her home after attending the Garbutt business college in Calgary for a few months.

The Tuxis Boys will stage an old-time minstrel show at the Opera House on Saturday night. Songs, jokes, skits, and everything that goes with that kind of a show.

Knox Church was filled to capacity last Sunday evening. The minister delivered the second of the series of sermons on "The life of Christ." The Junior Choir of Olds United Church sang three appropriate anthems.

Mrs. Alfred G. Studer entertained the Magazine and Book Club at four tables of bridge on Saturday evening, the prize-winners being Mrs. W. G. Evans, first prize and Mrs. Stewart Tighe, consolation. An interesting feature was the presentation of a book to Mrs. Cecil who is leaving soon to make her home in Lethbridge.

Alberta Election Date Is Expected.

Alberta will be in the thick of a provincial election, likely before July 1st, in the opinion of leading members of the Liberal and Conservative parties. Announcement of the date of an appeal to the electorate is expected shortly after the provincial house reassembles on Apr. 2.

In the interval the U.F.A. members are to talk over the situation with their constituents and ascertain the feeling in rural parts of the country before a final decision is reached at a caucus which will be held in Edmonton early next month.

During the last few weeks many Didsbury families have changed their place of residence. Lowries have moved to the house of the late Henry Weber; Rantons to the Scrutton house; Scruttons to the house formerly occupied by Mrs. Frey; Royds to the house vacated by Rantons; Hugets to C. Studer's house; Schwesingers to Huget's; Wrightsons to the house formerly occupied by J. C. Stevens; Axells to the house formerly occupied by Wrightsons; and Everard Clarke to the Axell house.

A pleasant time was enjoyed by all present at the progressive home to home bridge and whist drive given by the members of the Eastern Star on Tuesday evening. The changing from home to home proved to be an enjoyable innovation and the novel "favors" caused much merriment. The prize winners were: First prize for whist, Miss Audrey Hosegood and Mr. W. Leadbetter; consolation, Mrs. Wrightson and Mr. Frank Hazelton. First prize for bridge, Mrs. Kendrick and Mr. W. A. Teskey; consolation, Mrs. McGhee and Mr. A. R. Kendrick.

WEDDINGS

A very quiet and happy wedding was solemnized in the presence of immediate friends, at the Baptist parsonage, Olds, on Wednesday evening, March 19th, when Mrs. Clara L. Franklin, of Olds, was united in marriage to Mr. William M. Wilson, of Didsbury. The ceremony was performed by the Rev John H. Curtis. The newly-wed couple will reside at Armstrong, B.C.

Live Stock Association Organize.

A very successful and well attended meeting of the Alberta Co-operative Livestock Association was held in Berscht's Hall on Thursday last.

Mr. W. J. McCoy, delegate to the Livestock Pool convention held in Edmonton early in March gave an interesting report.

Mr. A. B. Claypool, M.L.A., spoke on the live stock pool as it is today and also outlined its future plans. He replied to numerous questions asked by the members which created much interest and explained that the processing business would not be entered into until a satisfactory sign up was obtained.

The principle purpose of the meeting was to organize under the policy of the Alberta Co-operative Livestock Producers Ltd. After discussing the main points of the pool, the meeting unanimously decided to appoint a board of directors, sign up as may contracts as possible and for the present to ship with the Cars-tairs association.

The following officers were elected: L. Helin, president; W. J. McCoy, vice-president; W. J. Scheidt, secretary; N. S. Clark, A. Wahl, W. Summers, A. Weber, and W. Archer, directors.

Mr. W. Cathro of Bowden spent the week-end in Didsbury with friends.

Messrs. E. G. Ranton and H. O. Tonjum were business visitors to Calgary this week.

Ship Cattle to Calgary Stock Show.

The following cattlemen of this district have entered cattle at the stock show and auction sale of pure bred cattle to be held at Calgary, April 1st to 4th: W. Ahlgren; Geo. Burns, J. T. Bolton, Hughes Bros, Robinson Bros., H. Klinck, and W. H. Lyons.

Mr. J. Fulkerth will ship a number of his prize winning horses to the horse show to be held in Calgary next week.

Tractor School Well Attended.

Much interest was taken in the Massey-Harris tractor school, which was held under the auspices of the local agents, Fisher and Edwards, in the opera house, Thursday last, there being over 80 farmer in attendance.

Mr. Percy Watkins, of the tractor department described all the working parts and instructed his listeners in the care and operation of the tractor so as to obtain the most economical service.

Mr. Donald May, general agent, spoke on the company's service policy and exhibited moving pictures of the different operations in the field.

The meeting commenced at 10 a.m. and the audience were kept interested until late in the afternoon.

Production and Marketing Problems

The question of disposing of surplus farm products in an orderly manner, and thus prevent disastrous breaks in prices by reason of the throwing of a large portion of the surplus on the world's market at one time, all with a view to securing to the producer a fair margin of profit over and above costs of production, is not peculiar to the wheat growers of Western Canada. It is a problem which confronts agricultural producers in many countries, and applies to other products than wheat.

Governments and producers are grappling with the problem. In Canada it is wheat; in the United States it is wheat, cotton, and, as affecting its overseas possessions and Cuba, in which the U.S. takes a friendly interest; it is sugar; in Brazil and other South American countries it is coffee; in certain British colonies it is rubber.

In each case the problem is a most complicated one. Such factors as world consumption; world production, fluctuating with variable seasons from under-production to over-production; the ability of importing countries to pay the price demanded as fair by the producing and exporting countries; different seasons and methods of marketing; costs of labor and marketing in one country as contrasted with those prevailing in other competing countries, all enter the picture and call for consideration.

In the Argentine, for example, orderly marketing as we would develop it in Canada is impossible. In that great wheat growing and exporting country there is no elevator storage system. When the crop is harvested it must be rushed on to the market at once, and the growers are obliged to accept the price they can get for it at that time. If the crop is large, or if there happens to be a substantial world's surplus at the time, the effect is to force down world prices, with resultant loss, not only to the Argentine grower, but to wheat growers everywhere. The Canadian Wheat Pool had to face just such a situation in 1929-30.

In the United States a Federal Farm Board has been created and given a huge sum of money to use in an effort to stabilize prices of agricultural products in that country. That Board is now facing its first test. It has called upon the farmers to reduce production of cotton and wheat in 1930, by planting smaller crops. Will the farmers as a whole, or even a majority of them, respond? Or will the individual farmer act on the belief that, as much as other farmers will follow this advice and prices thereby be raised, it is a good opportunity for him to increase his own production and secure the benefits provided as a result of the proposed general reduction? If so, then there is grave danger that a greater surplus than ever will be produced.

Or, if the United States farmers do follow such advice and reduce production, will advantage not be taken of it by wheat growers in competing countries to increase production, thereby defeating the object aimed at in world markets, and reap any benefits resulting from the sacrifice made by the United States farmers?

In a word, can the volume of production of such a world commodity as wheat be controlled? It is possible to control the output of manufactured articles, say, automobiles, boots, furniture, clothing, but can the production of nature's own goods from the soil be controlled in like manner by any artificial means, or must that be left to nature itself through the vicissitudes of the weather,—drought, hail, too much rain, plant disease and insect pests?

Great Britain tried the experiment of controlling the rubber markets of the world. For a time it succeeded; but just as soon as the world consumers of rubber felt the pinch of too high prices, steps to increase production in various ways were taken.

Or take the case of coffee. Brazil produces two-thirds of the world's supply of coffee. The Brazilian Government, to protect growers against price depression, in 1924 organized the Coffee Defense Institute. The Institute was not empowered to buy, but merely to see to it that coffee was kept in the interior, and released to exterior markets only when and as the demand and price-level were favorable. In the first few years of operation the Institute's aim was realized. The 1924-25 crop prices were almost exactly double the prices for which the 1922-23 crop had been sold. But there was one inevitable outcome. Higher prices for coffee and the restriction of Brazilian exports stimulated the output of other producing countries, with the result that Brazil no longer influenced the world market as much as previously. Whereas coffee production of all other countries before the war was only 6,000,000 bags a year, today it averages around 9,000,000 bags. Furthermore, Brazil went in more extensively for coffee growing. Following an average output of 14,000,000 bags annually during the decade beginning 1917, the crop production of 1927-28 reached the unprecedented total of 28,000,000 bags, or well above the estimated world consumption of 22,000,000 bags a year.

Then came the inevitable result. In October last, prices broke, and in January of this year prices for coffee were just one-half what they had been at the same period a year before. As a result there is in Brazil today a curtailment of credit, much unemployment, a cutting down of highway and municipal undertakings, a loss in foreign contracts, and a lessening of buying power in the other coffee countries of Colombia, Venezuela, Costa Rica, Guatemala, Salvador, Nicaragua, and Ecuador. The estimated world's supply of coffee for 1929-30 is 45,256,000 bags, while the world's requirements are placed at 23,000,000 bags, leaving an unsold surplus on July 1st next, to carry over of 22,256,000 bags, or nearly one-half of the total.

One of the leading United States agricultural weeklies, "Wallaces' Farmer," published at Des Moines, draws a lesson from "the sad state of Brazilian coffee and British rubber," saying: "Whenever an industry gets into position to control price, it is important to forget about cost-of-production theories. In a case of this sort, the only excuse for studying cost of production is to get an idea as to the point at which prices must be held in order to discourage other people from coming into the business and killing the goose that lays the golden egg, by stuffing her to death. The important thing is to hold the price a little too low, and apparently this is the one thing which organized farmers find it very difficult to learn."

Direct attacks are also made on the U.S. Federal Farm Board's plan to curtail production. One leading paper declares: "It is a distinct disservice to agriculture and to our economic structure in general to preach the doctrine of a sharply curtailed agricultural production. For with such curtailment must go migration of population from the farms to the cities, and with that either increased factory production creating the same problem of oversupply that now exists in agriculture, or an aggravated unemployment problem."

The magnitude of the problem confronting our farmers, our Wheat pools, our financial and business men, our Governments, can hardly be overestimated. Because of the very magnitude of the problem, and the results which will flow from success or failure in finding a solution, it is the duty of all our people, in city and country alike, to stand unitedly behind those who are earnestly seeking a solution, and who are carrying an extremely heavy burden of responsibility at this time. It is a case where all must pull together, where carping criticism should be silenced, and the professional pessimist and preacher of blue ruin squelched.

Soviets Seize Jewelry

Diamonds, precious metals, jewelry, foreign currency, antiquarian articles and other private property amounting to 100,000,000 rubles (about \$50,000,000), have been seized from private traders and other classes in Moscow, described as "parasitical" for payment of taxes owed to the government.

Made Wonderful Flight

Albatross Kept Up With Ship For 3,000 Miles

The flying powers of the albatross are well known, but news of an almost incredible feat of endurance has just been reported by officers of a Pacific liner from the Far East. For six days and nights an albatross followed the vessel, which averaged seventeen knots, and it was only when a school of fish was sighted that the bird abandoned the chase in order to feast. It was estimated that the bird had flown 3,000 miles, and what is more remarkable had apparently gone without food all the time.

**SUFFERED FOR YEARS
FROM NEURITIS**

Electric Treatment and Osteopathy Proved Of No Avail

To suffer for four years from neuritis. To try electric treatments, osteopathy, have teeth and tonsils removed without receiving the least benefit was the experience of Mrs. Simon Rae, of St. Mary's Ont. Today, however, Mrs. Rae is a well woman—thanks to Dr. Williams' Pink Pills. These Pills did for her what all other treatment had failed to do. They built up her blood and banished all the aches and pains.

Concerning her suffering and relief Mrs. Rae says:—"I was a sufferer from neuritis and rheumatism for four years. I was almost a cripple and the pain I endured was terrible. I took sixty electric treatments without the least benefit. On advice I had all my teeth out. Then my tonsils but still no benefit. I then tried osteopathy and though I persisted in this treatment for six months I was no better at the end than at the beginning. I was a young woman living on a farm and found the greatest difficulty in doing the least work. My mother finally advised me to try Dr. Williams' Pink Pills, and more to please her than anything else I did so. Imagine my joy on noticing an improvement in my condition after having taken only a few boxes. I continued their use and now the pains and aches have left me and I am once more able to do my work about the house."

Neuritis and rheumatism comes with thin impure blood and can be driven out by enriching and purifying the blood. Dr. Williams' Pink Pills have been recognized for years—the world over—as a wonderful blood builder and nerve restorer. They are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Need Of The Hour

The gentleman, who asked over the radio what is the most important thing in the world is hereby informed that the most important need in the world is for men who will stand before the microphone and say less and entertain more.

When a mother detects from the writhings and fretting of child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

Sugar Beet Acreage

Sugar beet acreage was increased to 3,470 in the Lethbridge region during 1929, or an increase of 1,188 over 1928, and comparing with 752 acres in 1925.

Time Has Tested It.—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

Foretold Use Of Steam

While the date of the invention of the locomotive is usually placed at 1829, Solomon de Caus, a Frenchman, published a book early in the 17th century concerning the "pushing of carriages and ships by boiling water and making steam." He was put in an asylum in 1630.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Regina Building Permits

Final figures of building permits for Regina show contracts just exceeding ten million dollars, or \$10,022,531 as compared with \$6,619,206 in 1928.

Reticent Regarding Age

Men In British House Of Parliament Hold Back Information

Reticence regarding age is a characteristic and privilege usually attributed to women, but not so in the British House of Parliament. There are 102 male members of the new House of Commons who have not, so far, confided their ages to Dod's Parliamentary Companion, an official handbook.

Seventy-nine of them are Labor members, 16 are Conservatives, six are Liberals, and one is an independent. Of the 14 women members, nine claim the privilege and do not state their ages.

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

A young Mississippi farmer who is only twenty years old has discovered how to make farming pay. His successful method was to elope with an heiress.

Saskatchewan Butter Production

An increase of 30 per cent. in the output of creamery butter over that of 1928 is seen in a report of the dairy branch of the Saskatchewan Department of Agriculture. The production during 1929 was 14,786,205 pounds of butter, as compared with 11,310,490 pounds in 1928.

Don't Get Bald!

Use Minard's. A recognized hair grower for fifty years. Apply to scalp steadily four times a week.

C.P.R. Farm Land Sales

Canadian Pacific farm land sales, made through the Department of Natural Resources, covered more than 400,000 acres in 1929, according to S. G. Porter, manager of the department. More than 200 sales were made in the company's irrigation block, eastern section, near Calgary.

**Too Much
ACID**

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Enormous Annual Losses Suffered By Farmers Due To Ravages Of Smut And Other Plant Diseases

The word disease generally brings to our minds a suggestion of some ailment which has fallen to the lot of man or beast. It rarely occurs to us that plants are subject to a line-up of disorders which would make the average sufferer from human ailments well by comparison. It is also true that the cost of plant disease is quite comparable to the money spent every year for doctor bills and the money lost through sickness.

Take our common smuts for example. They are plant diseases when we come to consider the matter, and they are among the most expensive luxuries which the farmers of Western Canada annually indulge in. In fact they probably cost the average farm considerably more than the car, for we learn that oat smuts alone cost the farmers of Ontario some two and one half millions. If a horse is laid up for a quarter of the year with a bad sweeney we soon think of the money it is costing to feed him, but smut can slip in and take a quarter of the oat crop and the loss is never noticed.

The smuts are bad enough, but as every farmer knows they are largely preventable. The worst offenders are the rusts, they are harder to deal with and, while the development of rust resistant varieties of wheat is now only a matter of time, we still lose several millions annually to those little spots on the stems which might be called the smallpox of plants.

But the smuts and rusts are only a beginning. There are cankers and galls, the potato has an imposing lineup of blights, rots and scabs, the fruit trees have their diseases from root to fruit. The loss caused by plant diseases each year is very nearly as great as the national debt. Most plant ailments are now preventable in the same way that science has gotten most human ailments under control, and with the additional possibility of breeding disease resistant plants, it is likely that in the next few years we shall see a decided reduction in the losses due to the diseases of plants. It is interesting, however, to remember that our human ailments are not the only ones which prove costly and which reduce our national efficiency.

Studying Cement Treatment

Saskatchewan University Professor Spending Some Months In Berlin

Professor Thorbergur Thorwaldson, of the University of Saskatchewan, building cement expert, is here conferring with Prof. Wilhelm Eitel, of the Kaiser Wilhelm Institute for the Advancement of Science, with a view to finding methods of improving cement.

Prof. Thorwaldson explained he was particularly interested in observing the X-ray work on crystals, carried out by Prof. Eitel, who is one of the greatest authorities on silicates.

"In our part of the country, cement is an important commercial article, and everything that can be done to improve its quality is of vital interest. I am thus combining scientific research with practical purpose by seeing in what way Eitel's methods can be applied to cement," he said.

Prof. Thorwaldson expects to remain here for three or four months.

"Your uncle is 90 and still mentally active?"

"Yes, he plays chess every evening."

"Is he still physically active?"

"Rather. If he does not win he hits his opponent over the head with the chess board."—*Flegende Blätter*, Munich.

W. N. U. 1827

Suggests Settlement Plan

Soldiers' Settlement Board Supervisor Has Idea Of Colony

A scheme for future land settlement was outlined at Hudson Bay Junction before the Royal Saskatchewan commission on immigration and settlement by Captain A. A. Batcheler, supervisor of the Soldier Settlement Board for the district.

"A block of land, consisting of a township or more, should be selected," he said, "and fields of 50 acres cleared and cultivated on alternate sections. A main road should be built and a barn and water supply provided for each farm. A school and a central community hall, which could be used as a church, should be built. Then, selected families from Great Britain should be placed on this land, which would be sold to them at the actual cost of improvements."

The taking of such land, according to Captain Batcheler's scheme, would mean the forfeiture of any homestead right. He would have the alternate sections treated in the same manner after a period of two years from the first settlement, and these thrown open to Canadian people on the same basis.

Not Ready For Zoo

Horses Are Being Used More Than Ever In Chicago

Not long ago the city fathers of Chicago were thinking of setting aside a pasture in Lincoln Park Zoological Gardens for the horse as a rare animal, but now city life is offering excellent careers for young horses willing to work as haulers of milk wagons, ice vans, and fruit trucks,

with the prospect of a nice green field in 20 years. Horses have shown a remarkable revival in Chicago, where 10,741 horse-drawn vehicles were registered in the first seven months of 1929, as against 11,986 in the whole year of 1928.

Always throw a drowning man a rope, even if he's trying to commit suicide. If the water isn't deep enough, he may want to hang himself.

LEADING AGRICULTURIST

With fifteen years practical experience in agricultural and livestock affairs and having represented Canada on an Imperial committee to study the meat supply of the British Empire, Leonard Christie McOuat has recently been appointed general agricultural agent of the Canadian Pacific Railway.

He was born at St. Andrews East, Quebec, in 1882, and took his degree of Bachelor of Science in Agriculture at McGill University. After returning from military service in the war, Mr. McOuat was called to Ottawa as bacon specialist of the Dominion Livestock Branch, Department of Agriculture, and, following a special study of the British meat market, was selected to join the first Imperial Economic Committee to investigate and report on British Empire meat supply which met in London, in 1925. His wide knowledge and experience are now at the service of the Canadian Pacific Railway.

Another Non-Sleeper

Man In England Claims He Has Been Awake Twenty Years

An amazing record is claimed by E. T. Maher, of Heaton, Newcastle, England, who affirms he has not slept for 20 years, according to the Manchester Guardian. Mr. Maher, who works as a store keeper in Newcastle, was known as the battalion "caller up" whilst serving with the York and Lancaster Regiment during the war.

He has undergone several operations, but the doctors are still baffled. It is stated that they can neither explain the affliction or cure him.

Study Of Dairy Conditions In Canada During The Past Decade Is Well Worthy Of Attention

Canada's Exhibits At the Poultry Congress

Each Province Is Working On Its Own Display

Canada will occupy a conspicuous part in the forthcoming World's Poultry Congress. No pains are being spared to take full advantage of the opportunities provided in putting up exhibits that will be a credit to the country.

The national exhibit being prepared on an elaborate scale by the Live Stock Branch of the Department of Agriculture, at Ottawa, will demonstrate clearly the policies that have developed the Canadian poultry industry to its present enviable position, but will also show the effect of the policies in operation upon poultry and egg consumption.

The provinces are equally active in preparing their displays that will draw attention to not only the poultry industry, but other activities of world interest. The Maritime Provinces are getting together in putting up one exhibit. The three Prairie Provinces are co-ordinating their forces in a similar manner, while the other provinces are each preparing elaborate displays for definite spaces that have been allotted to them in the great Crystal Palace.

The Live Birds Exhibit of one thousand head, including chickens, waterfowl and rabbits, is being arranged on a national scale, and will include representatives not only of the hardy, high-producing stock of the most popular birds, but will also include representative specimens of what are sometimes termed "Fancy Breeds," and including waterfowl and pigeons. The exhibits will be a credit to Canada.

Byron's Home Purchased

Historic old Newstead Abbey, famous as the ancestral home of Lord Byron, has been purchased by Sir Julien Cahn for presentation to the British nation unconditionally. Sir

Julien is a noted philanthropist and sportsman. By owning a half share in the Stock Exchange sweep ticket on Trigo, Derby winner of last year, he won \$310,000.

With the round of dairy conventions in the prairie provinces complete for 1929, some facts and figures issued by J. F. Singleton, acting dairy commissioner, are of interest.

A study of dairy conditions from 1920 to the end of 1929 shows that there are fewer establishments turning out butter, cheese and milk products, but the number of producers of milk has increased; that there has been an increase in the total number of cows and in the number of cows in a herd; that the production of creamery butter has increased materially while that of cheese has decreased; there has been no material change in the production of evaporated or condensed milk, but a very decided increase in milk powder and condensed skim-milk; there has been an increase in the total milk production and also a greater volume has been produced per establishment.

Between 1920 and 1927, with the exception of the province of Quebec, which is not included, Canada increased her creamery butter production 60.9 per cent., and decreased cheese production 7.8 per cent. The quantity of milk sold for immediate consumption increased 48.9 per cent., and the quantity of cream sold calculated in terms of butterfat increased 54.9 per cent. The total number of cows increased from 1,599,145 in 1920, to 2,124,362 in 1927.

In 1929 Canada imported 32,182,486 pounds of creamery butter, valued at \$11,424,476, and 2,003,470 pounds of cheese, valued at \$597,782. In the same period Canada exported 1,480,600 pounds of butter, valued at \$617,483, and 93,556,100 pounds of cheese valued at \$18,752,660, and 2,416,470 gallons of cream, valued at \$4,999,026. In 1929 the total value of dairy products imported into Canada was \$12,085,653, and the total value of exports, \$27,993,673, leaving a net value of exports over imports of \$15,888,020.

The increase in total consumption of butter, cheese, milk and ice cream expressed in terms of fat equivalent was 143,026,288 pounds.

The figures show that there is still room for a very considerable increase in the per capita consumption of cheese and also the indication is pretty plain from the per pound value of exports over imports that sometimes it may be economically sound to export at some seasons and import at others.

The imports of butter were, of course, mainly from New Zealand, and George Barr's advice to Ontario creamery men may also apply to mass production in the west, namely, make your whole output so good that the consuming public will be glad to pay more for it than they would have to pay for New Zealand.

Used To Credit Sales

Clerk Was Astonished When Offered Cash For Purchase

A New York paper says: A big merchandising event came recently when a young couple from out of town, who have just settled down in the East Nineties, went to Sloane's to buy some chintz curtains. They gave the clerk who waited on them the exact amount of the purchase in cash. He stood staring at the money. "What's wrong?" asked the husband. "Well, sir," said the clerk at last. "I've worked here many years, but I never made a cash sale before and I scarcely know what to do with the money."

"May Providence grant you everything good in the New Year."

Mrs. Newrich: "Thanks. We are not dependent on the charity of others."—Jugend, Munich.

QUEENS

Not even Versailles in the heyday of its fashion graced about its queen a court more beautiful than that which will adorn the Queen of The Pas Winter Carnival on March 4th. Candidates for the Queen will be chosen from the attractive western girls shown above. Reading downwards they are: 1, Miss Laura Robson, Flin Flon Mines, Man.; 2, Miss Enid McGregor, Regina, Sask.; 3, Miss Margaret Halliday, The Pas, Man.; 4, Miss Annabelle Halderson, Winnipeg; 5, Miss Helen Mulhal, The Pas, Man.; 6, Miss Gladys Chute, The Pas, Man.; 7, Miss Mabel Milne, Saskatoon, Sask.

Canyons In Jasper Park

The number and depth of the canyons in Jasper National Park in the province of Alberta, are of special interest to nature lovers. Each canyon possesses a turbulent stream and often a fine waterfall as well. The Athabasca and Maligne canyons, the Rocky River, Fiddle Creek, and Ogre canyons to the east, and the Snake Indian canyon with its magnificent cataract, are among the most spectacular in this wide park reserve of 4,521 square miles.

THE CHAIN LETTER NUISANCE

One of the petty irritations of life is provided by the chain letter. This consists of a letter originally sent out with the request that it be duplicated to nine of the recipient's friends, they in their turn to repeat the procedure. A threat of bad luck if the chain be broken and of good luck if it be continued accompanies the letter.

This sort of thing has been going on for years, but not until recently has there been any outspoken public protest against it. Somebody, however, had the temerity to put the names of George Bernard Shaw, Henry Ford, Aristide Briand, Ramsay MacDonald, and other eminent men on one of these letters, and now the fat is in the fire.

Mr. Shaw has taken the matter up with characteristic vigor. He has written a letter stating that he never signed or passed on a chain letter of any kind. "And," he adds, "I have never lost an opportunity of urging that the criminally thoughtless people who start or forward such things should be executed without benefit of clergy."

Allowing for Shawian exuberance, there is a good deal to be said for Mr. Shaw's attitude. Apart entirely from the waste of time, this sort of letter would, if its senseless intent were carried out, put an enormous burden upon postmen. Moreover, it gives nervous people a great deal of discomfort awaiting bad luck in the event that they forgot to send on the letter, or anticipating good luck that does not come. While no law is broken, it is one of those things that ought to be sternly denounced in the general welfare.

CANT PLEASE EVERYBODY

The world is full of good-natured people who try to agree with everybody. If they have any opinions of their own they conceal them in their effort to avoid hurting someone else's feelings. But they don't get anywhere. They don't gain the respect or the confidence of anybody, and they count for nothing, or next to it, in the lives and affairs of their family and their communities.

How far would a minister get on his mission if he tried to make his sermons please everybody in the congregation? The question answers itself. The politician who flatters all of his constituents and agrees with whatever any of them thinks seldom gets elected and if he does he is even more seldom renominated. The business man who would let every customer tell him how to run his store would soon be bankrupt. And the newspaper editor who did not have any opinions of his own but ran his paper to suit the supposed views of everyone of his subscribers would find himself in a sorry fix.

There is one rule for everyone who is ambitious to get along in the world and to be a respected member of his community, his province and his country. That rule is to form his or her own opinions, form them in the light of reason and change them only if reasonably convinced that they were

LOCAL & GENERAL

Mr. Roger Barrett unloaded a car of John Deere tractors last week.

Mr. Ken Huff of Olds was a business visitor in town on Tuesday.

Big April Fool dance, Monday March 31st. Bones orchestra of Red Deer.

Miss Clements of the hospital staff spent a few days in Calgary this week.

Mrs. A. Campbell and Miss Norah Campbell, of Carstairs, were visitors at the home of Mrs. W. G. Evans last week.

A meeting of the U.F.A., Didsbury local, will be held in Bersch's Hall on Friday, April 4th, at 2 p.m.

Don't forget the big April fool dance, Monday, March 31. Bone's orchestra. This will be the big dance of the season.

Mr. and Mrs. Frey returned to their home at Alsask this week. Mr. Frey has been attending the Bible School here.

Two good plays "Mrs. Stubbins, book agent," and "Mr. Bob," will be given at the Community Hall on April 4th by the Melvin Go-Getters Dance afterwards. Everybody welcome.

The Didsbury Rebekahs are announcing a tea, to be held at the home of Mrs. Bert Fisher, April 1, from 3 to 6 p.m. Madam Helene, gypsy fortuneteller, will be present. April fools! Cake? Something new!

The Olds United Church Choir will present its two popular plays, "Mix Well and Stir" and "Friday for Luck", in the Harmattan community hall on the night of Friday April 4th. The plays will be interspersed with musical selections by Olds talent. At the conclusion of the choir stage presentations, the Olds Elks Orchestra under its auspices will hold a dance, at which the well known troupe of Brother Bills will play all the modern fox-trots waltzes etc. This will be a big night at Harmattan.

wrong, and then to stand by them, courteously but firmly. Even those who disagree will respect the man who honestly and sincerely holds to an opposing view. And it is better to be respected than tolerated.

TRACKWAYS PROJECT

Defeated for the third time, the Alberta Trackways bill is now "rejected and out," so far as the present legislature is concerned. It is hardly likely that those promoting the project will feel sufficiently encouraged to show further interest in this super-highway proposal.

In view of this rejection, one might reasonably assume that the Provincial Government intends to itself construct super-highways for this province. Some grounds for such hopes were provided in the Premiers' address during the debate, when he observed that should the government decide to hard surface existing highways, it could do so at a cost fifty per cent less than the proposed trackways would require in expenditure.

There should be no doubt regarding the rapid growth of the motor traffic and tourist trade in this province. During the next few years the volume will assuredly show amazing gains, greatly eclipsing any figures of recent years.

If private enterprise is not to be given the privilege of building super-highways, and if this is something that the government has reserved for itself, then all is well. But the drawing power of such a highway should not be lost sight of, even by the government in considering its general highways program. The importance of main motor routes constructed of good material and economical from a maintenance standpoint, cannot be overlooked in times when Alberta needs to expand the tourist business.

—Good Roads.

Smashing all known records for
the 120 miles of heavy going that
characterized the International Dog
Sled Derby run at Quebec recently,
Emile St. Godard galloped in to
his fourth victory. In that event
when he led Leonard Sennala to
the tape by a margin of five minutes
flat in eleven hours, one minute
and 27 seconds for the whole
distance. St. Godard won \$1,000
cash and a gold cup. There were
twelve contestants in the race.

The western branch lines construction programme of the Canadian Pacific Railway for 1930, announced at headquarters of the company recently, will involve an expenditure of \$11,000,000, said D. C. Coleman, western vice-president, interviewed at Winnipeg. In addition to this sum, ten million dollars will be spent on improvements designed to increase the capacity and efficiency of lines operated in the west.

Read the Classified Advertisements! It Pays.**When Ceasar was a boy**

THE Forum was the common market-place for all of ancient Rome. Today a few crumbling columns stand as mute reminders of its former grandeur.

In our present day complex civilization, market places have become scattered. It is no longer possible to visit them all in a morning—or even in a day.

Advertising, instead, has become the convenient Forum of modern buyers and sellers. If you are considering the purchase of a new car, you scrutinize the automobile advertising. Or if it's a razor or a talking machine that you want, you turn again to the advertising. Here is the national market-place for merchandise.

Furthermore, as you leaf over those same pages of products, your mind is storing away for tomorrow a compact and valuable fund of information. Instinctively, you will remember those facts when you make your future purchases. Increase your store of knowledge by reading the advertisements regularly.

Didsbury 8 p.m.**WHAT OTHER EDITORS ARE SAYING****THE SKATING RINK**

A very largely signed petition asking the council of Innisfail to take steps to provide a covered skating rink, will be presented to the Town Council at their next regular meeting early in April.

The leaders of the movement are to be congratulated in starting at the correct time of year. There will now be plenty of time to make a thorough investigation into the whole proposition and get all the data and the costs.

If the citizens of Innisfail want a skating rink and it is within our means, it is certainly up to the council to provide same.

The council should make careful investigations and weigh the matter most carefully.

Innisfail young people have practically no winter common playground and the value of a rink to the growing generation cannot be questioned.

It is a matter of vital importance to the parents and we feel confident that the matter will be given every consideration.

We would suggest that a committee consisting of two or more members of the council and two or more citizens be appointed to go into the question and procure all the data possible and bring in a report at the May meeting of the council.

MILK AND THE CHILD

All mammal babies, human and otherwise, live the first few weeks or months of their life on milk alone. It is a complete food in itself. It contains all the constituents necessary to preserve life, so that it is a very necessary part of the daily diet, especially for children. Yet there are children who do not drink milk—children one will say of poor homes, where the financial circumstances do not permit of milk. That is so, unfortunately, but there are other children who are not given milk, not because it is impossible to buy it, but because the parents do not know enough to give it, or knowing, are too lazy to make the effort to make the milk palatable.

The winter has seen on too many occasions a tin of Nestle's milk on farm house dining tables. The one place where fresh, rich milk should have been forthcoming.

The young stock were given milk, calves, pigs, turkeys and chickens, even the cats, but the farmer's children were fed from a tin. Milk is so necessary and can be given in so many palatable ways, that all children can eat and enjoy. It is a very short-sighted policy to deprive the growing boy or girl of a food that assists so materially in that growth.

Why give more thought to the young stock than to your boy or girl?

Literature on milk and milk dishes can be obtained free from the Canadian Red Cross, 407 Civic Block, Ed-

Mr. Howard Evans, of Clarendon, spent the week-end with his parents.

The Didsbury Pioneer - Phone 12**Taking the School to the Scholar**

Providing schooling for children in the isolated sections of Northern Ontario long baffled the Ontario Department of Education. The little red school house—if it had been built—would have stood alone with no sign of human habitation for miles around or, if there had been a few houses near, the cost of upkeep would have been too heavy a burden on a few scattered families. So the Canadian Pacific Railway was called into consultation and the result is the travelling school car which has been operated during the winter months with increasing success for the past few years.

Every child loves a train, but when that train comes especially to him and becomes his school—well, you have to go to fairy tales to get the like of that. So they come enthusiastically from miles around, French-Canadians, Rumanian, Indian, Italian, English-Canadian—all races and ages from five to fifteen years of age. They come on snowshoes, skis, by dog team, from near and far. They get the three R's and they get acquainted among themselves. Difference of speech makes little difference to them and soon they are all using English. Children of pioneers, they are bright and adaptable. Lay-out shows exterior of car, interior with class. of boys and girls all set for lessons; another interior showing teacher and black board; and two typical school children on their way to the car.

WRIGLEY'S

Life—like good golf—is made up of many little things each one of which helps the score.

Better digestion—steadier nerves—clearer brain, are all factors that count and are gained from the use of Wrigley's.

Turkey From Alberta On Way To West Indies

A turkey from the farm flock of Mrs. R. Lockhart, Bowden, Alberta, is on his way to his new home in the West Indies, having been shipped to the Misses Boyd Stimpson, of Portus, Jamaica, reports G. M. Cormie, Alberta poultry commissioner.

This bird was selected by R. S. Johnson, president of the Alberta Bronze Turkey Breeders' Association, and shipped to Halifax, where he was loaded on shipboard for his destination. A special crate was constructed to carry the feed and water required by the turkey during his five-thousand-mile trip.

(By Annebelle Worthington)

3315

A navy blue wool crepe that employs a scalloped border in vivid red shade is strikingly smart for that important age of 8, 10, 12 and 14 years. The red crepe appears again in belt that marks the normal waistline and in piping of collar, flared cuffs and bow tie.

The straight bodice suggests a basque. The skirt is circular, shaped with fluttering fullness at hem.

Style No. 3315 is just as smart as can be. It is practical too. It is just the thing for classroom and will make an attractive outfit for Spring without a topcoat.

It is very fashionable in wool jersey in hunter's green with white pique collar and cuffs.

Tweed in beige and brown check in lightweight with collar, cuffs and border cut on the bias is fetching, worn with a brown suede belt. Pipe the border at upper edge, and collar and cuffs around the outer edge with brown bias binding that comes already folded for this purpose.

Sportswear linen in tan with brown trim is very effective.

Wool challis print with plain challis, printed and plain rayon crepe, checked and plain gingham, flat silk crepe and shantung also suitable.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Persian Balm—the ideal toilet requisite for every discerning woman. Perfect in results. Creates complexion of rare beauty and charm. Delightfully cool and refreshing. Never leaves a vestige of stickiness. A velvety smooth lotion toning and stimulating the skin. Making it truly roseleaf in texture. All dainty women invariably choose Persian Balm. It imparts that subtle distinction so characteristic of the elegant woman.

They call her Mussy Lena, 'cause she's the Fascist girl in town.

Minard's Will Kill Corns.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the gases. Sweeten the sour and acid stomach, relieve the gas and encourage digestion.

The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

Stronger Than the Empire

Commonwealth Of Nations Has Been Wonderful Step Forward

Probably few British statesmen fifty years ago believed that the decentralizing of the Empire could go as far as it already has gone without disaster. Certainly, most statesmen of other countries agreed with Bismarck, who thought that the yielding of power by the central authority was a sure sign of weakness and decay. If he could have seen the Canadians holding out under the mysterious horrors of the first gas attack, or the Australians helping to smash the Hindenburg line, he might have changed his mind. To date, the ties created by sentiment and enlightened self-interest have more than replaced the bands of compulsion laid aside as outworn. The Commonwealth of Nations is stronger than the Empire.

Heart and Nerves Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes:—"Several years ago I was troubled with my heart and nerves and was so bad, at times, my hands and feet would become numb and cold."

"I happened to see

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The Latest In Houses

Model Exhibited In Copenhagen Depicts Homes Of the Future

A full-sized model of a wholly new type of house, "designed without regard to popular prejudice," was one of the novel features at the recent House and Building Exhibition in Copenhagen. The house is circular in plan, with a flat prismatic glass roof. The entrance corridor leads to a central hall, from which the other rooms open, following the course of the sun, according to the use for which the rooms are intended. On entering the corridor one steps on a perforated rubber mat, the pressure starting an electrically operated vacuum underneath which removes dust from the boots.

Here are some of the other novel features: Beds, which are supplied with rubber air mattresses, are let into alcoves, and a radio apparatus is fitted into a niche beside each. In the parlor is a glass-top table on steel legs, the top so adjusted that it will revolve and bring to hand anything lying on the opposite side. This room is equipped with magnavox and television apparatus. Alongside is a suction tube connected with the local post-office for reception and despatch of letters.

A circular over-room in the centre of the roof, reached by an elevator, provides sleeping accommodation for the children, and gives them direct access to the roof games. On the top of this over-room there stands a helicopter, provided with suction feet to hold it fast in case of storm. Antennae over the roof pick up electric energy transmitted wirelessly for the lighting and heating of the house, and all sorts of auxiliary services.

Plant Combats Sea

Raises Level Of Land Until It Becomes Dry

In South-East Essex, England, where much of the land lies below the level of the sea at high tide, an interesting experiment in protection from sea erosion is being made. A plant, known as Spartina Townsendii, has been placed in various spots where the sea encroaches. This curious grass-like vegetation is able to take root even in mud where a man must sink and, after getting a grip, it raises the level of this mud several inches a year, until eventually, it becomes high and dry land. Pastures that have been lost for many centuries are now being regained by the help of this friendly plant.

We are not much of a cook, but we do know better than to boil two cups of rice for two people.

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Your Child's Cold

Needs this Double Treatment

CHILDREN hate to be "dosed." When rubbed on, Vicks relieves colds 2 ways at once without "dosing":

(1) Its healing vapors, released by the body heat, are inhaled direct to the air passages;

(2) "It draws out" the soreness like an old-fashioned poultice.

CHAPTER III.—Continued

"A very green hat?" questioned the doctor.

"Exceedingly green," replied Charmian. "Have you made its acquaintance this soon?"

"No, but we passed it on the road, or more correctly speaking, on the girl. I'll say it was some hat!"

"It came from Chicago," sighed Charmian. "It was ordered by mail. Are you aware what a—er—distinguished thing it is to order a hat by mail?"

Though she spoke soberly, the corners of her mouth refused to remain sedate, and the doctor burst into a hearty laugh. They were chatting like old friends when they joined Grandma a moment later.

"You seem to be having a real good time," she commented. "Sit down, both of you. No use wasting your strength standing when it's not necessary. The doctor's over to the Oldhams' giving Susy a talking-to, or I miss my guess. She's been feeding her baby mince pie again. At least, I think she has for the poor child's in a spasm and the doctor had to run. He was black in the face—the baby, I mean; and little Jamie was all out of breath from hurrying. Well, young man, did you decide on a room or aren't they good enough?"

Daughter Is Stronger Now

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls are taking it with good results."—Mrs. Clarence Jenkinson, Box 14, Thornloe, Ontario.

and Cobourg, Ontario, Canada

W. N. U. 1827

"They're much too good," replied John Carter, as he brought a chair for Charmian, and took the one by Grandma herself. "I shall feel like royalty, sleeping in that magnificent old bedstead."

"The four-poster? Then you've taken the room in the ell. Well, it'll make things easier for Charmian, even though it doesn't seem exactly proper to let you sleep where the help used to. It's sunny. I'll admit that, and warm in winter. Father Davis wasn't one to put his help into a cold room. 'They're human beings like the rest of us,' he used to say, 'and they shan't freeze so long as they'll carry up the coal.' That was before we put in the furnace. We had the first furnace in Wickfield," she added proudly. "Folks came from far and near to see it, and stand on the registers. I remember old Miss Buzzell saying that it was immoral to be so comfortable."

"I venture to guess that Miss Buzzell wasn't a cheerful person to have about," said John Carter with a smile.

"And you've guessed right," replied Grandma with decision. "Nothing ever suited Bessie Buzzell. Yes, you can smile, but that was the name they gave her in the cradle, and she carried it to the grave, no man ever having the courage to ask her to change it. The weather was always too hot for Bessie Buzzell, or too cold. If the sun shone, she'd be sure it would rain next day; or if it rained, she was certain it would rain all the week. The minister preached too long, or else he wasn't giving full measure for his salary. Father Davis used to say that when they gave her a harp in Kingdom Come, she'd ask for a bass drum. Here's the doctor now; but Lizzie Baker's stopped him at the fence. Was Lizzie ailing when you were there, Charmian? If she is, and eats that pudding for her supper, she'll regret it."

"I imagine," replied Charmian, "that she merely wants to hear the latest gossip, and hopes the doctor can supply it."

"She'll be disappointed," returned Grandma with a chuckle. "If anybody in Wickfield knows how to keep his mouth shut, it's Edward Howe. That's what you'll have to learn, young man if you haven't learned it already. A doctor who's a busybody never succeeds. Folks know they see too much, coming in when there's sickness in the house and things upset. Why, some folks aren't the same characters at all come sickness! There's Jamie Oldham, a limb of Satan if I ever saw one; but get him all broken out with measles, or his neck tied up in a rag for sore throat, and he's the meekest lamb that ever bleated."

"And his father's just the opposite—as godly a man as ever passed the contribution box on Sunday; but when he has a cold in the head, Susy (she's his second wife), goes almost crazy. Once Ezra Bascomb was setting a light o' glass in the Oldhams' cellar window. He's our R. F. D. man, but he does such jobs on holidays to help folks out and make an extra dollar. Well, Ezra was working in the cellar, but the door upstairs was open into the kitchen. The deacon was laid up with a touch of rheumatism, and he swears—"

"Who? The deacon?" interrupted John Carter, grinning.

Grandma's eyes twinkled.

"Well, according to Ezra," she began; then broke off suddenly, "Dear me! here I am commanding Edward Howe for keeping his mouth shut, and rattling on about my neighbors with my next breath! But you'll find us out, fallings and all, if you stay in Wickfield. Charmian, you run and make some lemonade. Here comes the doctor, and he looks hot."

CHAPTER IV.

Charmian stood on a stepladder in the room that had been Great-grandfather Davis's law office. The doors and windows were opened to the breeze, and one passing could have seen, at frequent intervals, the furious shaking of a duster. For three weeks the doctor had occupied the ell bedroom. It had been Grandma's suggestion that he use the small building across the driveway for an office. They were at breakfast one morning when the idea came to her.

"Look here," she said. "You ought to have a place to see your patients. They'll have none of you so long as you go to Edward Howe's. Why not use Father Davis's office? It's handy to the street, and as good a location as you could find."

"You mean that little old place in the yard here?"

Grandma nodded.

went across the driveway to the office.

"I'll make a start," she mused, as she stood for a moment surveying the dust of years. "The first thing is to clean the top bookshelves. No use sweeping the floor with all that dust to come down upon it." However, she had hardly reached the top step of the ladder when a shadow fell across the doorway and some one said:

"What in thunder are you doing here?"

"Gracious! How you scared me!" The girl turned around and regarded the caller from her perch. "Where'd you come from, Jim, this time of day?"

As Jim Bennett came nearer Charmian saw at once that he was wearing a new suit of rather better cut than usual, and that his shoes were polished to the "nth" degree.

(To Be Continued.)

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the New Born Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulates the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Edmonton Civic Utilities

The five Edmonton city owned utilities created a record surplus during 1929 of \$516,562, in comparison with a surplus of \$507,765 the year before.

Dr. Guild's GREEN MOUNTAIN ASTHMA COMPOUND

Little Helps For This Week

"I will not let Thee go, except Thou bless me."—Genesis xxxii. 26.

Like a tide our work should rise,
Each later wave the best,
Today is a king in disguise,
Today is the special test.

Like a Sawyer's work is life,—
The present makes the flaw;
And the only field for strife
Is the inch before the saw.

—John Boyle O'Reilly.

The days are ever divine. They come and go like muffled and veiled figures sent from a distant friendly party; but they say nothing, and if we do not use the gifts they bring they carry them as silently away.

—Ralph Waldo Emerson.

Needless Pain!

The man who wouldn't drive his motorcar half a mile when it's out of order, will often drive his brain all day with a head that's throbbing.

Such punishment isn't very good for one's nerves! It's unwise, and it's unnecessary. For a tablet or two of Aspirin will relieve a headache every time. So, remember this accepted antidote for pain, and spare yourself a lot of needless suffering. Read the proven directions and you'll discover many valuable uses for these tablets. For headaches; to check colds. To ease a sore throat and reduce the infection. For relieving neuralgic, neuritic, rheumatic pain.

People used to wonder if Aspirin might be harmful. The doctors answered that question years ago.

It is not. Some folks still wonder if it really does relieve pain. That's settled! For millions of men and women have found it does. To cure the cause of any pain you must consult your doctor; but you may always turn to Aspirin for immediate relief.

Melvin Notes.

Several from the district took in the much talked of picture, Gold Diggers of Broadway, in Calgary this week.

The play and dance Friday night had a very good crowd, considering the roads. Everybody seemed to enjoy themselves.

The schedule games played by the four teams have ended, and Rugby team was successful in winning the cup.

Miss M. Johnston returned from Three Hills on Sunday.

We are pleased to have Mr. Angus in our district, he has purchased Mr. Andersons farm.

We are glad to be able to report the good news, that Mrs. A. Ester is improving nicely after her operation last week.

We hope to hear of Mr. Norman Clarkes speedy recovery from his operation.

Miss Janette Percival of Winnipeg spent the week-end with her cousin, Mrs. O. O. Swingle.

Mr. and Mrs. A. Krebs and Mr. and Mrs. O. O. Swingle spent Saturday in Calgary.

Mr. Ed Parker is visiting his old friends, after spending the winter with relatives in Saskatoon. We hear Mr. and Mrs. Parker intend spending the summer in Ontario, making the trip by car.

Canadians drink nearly 100 per cent. more milk than they did in 1921. The per capita consumption is about one pint per day, or 47.8 pounds, per year, compared with about one-half pint per head of population in 1921. The milk consumption in the United States is about 458 pounds per capita per year or less than a pint per day per person. Canadians eat more butter than the people of any other country in the world—29.31 pounds per capita per annum—an increase from 25.79 pounds since 1921. Their appetite for ice cream has increased from 5.26 pints in 1921 to 7.04 pints in 1928, and the per capita consumption of cheese has risen from 2.51 pounds in 1921 to 3.54 pounds.

Jenkin's Groceteria

More Hogs Wanted.

Wanted — more hogs. With a good market established in Britain for Canadian bacon, not one pound of pork has been exported in 1930. This is the first time such a condition has occurred in 40 years.

While Canadians themselves are consuming practically all the bacon produced in this country, yet there

is demand for quantities more. The production though increasing is not keeping up with available market. During the past five years one million more hogs could have been marketed each year at approximately \$25.00 each, than were available.

Farmers are overlooking a real source of revenue and breeders have failed at a time when opportunity offers.
